

Step 1: DOWNLOADING & UNZIPPING A.I.R. EXPANDED

To get up and running you will need to first download and unzip 'AIR_EXPANDED_UPGRADE.zip'.

UNZIPPED FILE CONTENTS

The illustration above shows the contents of the unzipped file.

Step 2: COMPILING THE DOWNLOAD

To upgrade drag all of the contents from the unzipped AIR_EXPANDED_UPGRADE folder to your "Ambience Impacts Rhythms" folder. This should be in the location where you originally installed A.I.R. When prompted, replace all existing files.

Step 3: KONTAKT / KONTAKT PLAYER INSTALLATION

If you do not already own Kontakt or Kontakt player version 3.5 or higher, you will need to download and install the free Kontakt Player 4 from Native Instruments website.

<http://www.native-instruments.com/#/en/products/producer/kontakt-player/>

If you already own Kontakt 3.5 or higher, then the upgrade is completed.

ENJOY!!!

TROUBLESHOOTING

If you are having problems with installation / activation please contact Sample Logic LLC directly via e-mail at: support@samplelogic.com
